## Bill & Sandra Pomeroy Addiction Treatment Center at Crouse Health

The Bill & Sandra Pomeroy Addiction Treatment Center at Crouse Health is a two-story, 42,000 square-foot facility located on Erie Boulevard East in Syracuse, N.Y. This building is the new setting for Crouse's outpatient treatment services; it had outgrown its former location on South Crouse Avenue.

Klepper, Hahn & Hyatt was tasked with landscape architecture and civil engineering design services. Said services included parking lots, drives, and associated sidewalks, as well as stormwater management and landscaping.

The previously developed and abandoned four-and-a-half-acre site was completely redeveloped to what is now an active parcel on the Erie Boulevard corridor. This project coincided with the now complete statewide effort known as the Empire State Trail, which reconnected the historic Erie Canal corridor by creating or enhancing pedestrian- and bike-friendly lanes. As the landscape architect and civil engineer, our work included site design conforming to building layout, site circulation, and facility programming of the site.
